SUBJECT: Tiede/Littlerock Water System

Dear Mr. Johnson:

This office has been working with Mrs. Nancy Tiede for several years in an attempt to provide an approved water supply to serve several existing homes and businesses in the Littlerock area. A well and reservoir have been constructed on the hillside above the town and a distribution main has been completed into town. While this source of supply is constructed to meet current health standards and would provide a much safer supply of water, I understand that your review and approval can not proceed without water rights approved by the Department of Ecology.

Little rock has no community water supply, therefore most of the homes and businesses (stores, tavern, post office etc.) obtain water from shallow, unapproved wells. This office is concerned that further delay in approval and construction of the water system has the effect of placing the health of the citizens at risk. Is it possible that there could be some agreement or memorandum of understanding between your office and Ecology that would allow for construction of the system while limiting the connections to only existing homes and businesses with inadequate, unapproved water supplies until such time as the water rights are approved?

This office would be willing to provide any assistance with respect to evaluation of existing water systems and controlling connections if this would help in this decision. Please let me know if we can assist in any way. Thank you for your consideration of this matter.

Sincerely,

  
Philip J. Brinker, R.S.

Dear Mr. and Mrs. Tiede:

Re: Ground Water Application No. G 2-28736

We acknowledge receipt of your affidavit of publication of notice in connection with the above-numbered application.

The water codes require that no action be taken toward issuance of a permit earlier than thirty (30) days after the last date of publication. This period of time is allowed for filing any protests or objections.

A site investigation will be made by this office before we issue a permit decision. In light of our water right backlog, we estimate it will be about 18 months after receipt of your application before we are able to conduct the site investigation.

Sincerely,

## STATE OF WASHINGTON DEPARTMENT OF ECOLOGY NOTICE OF APPLICATION TO APPROPRIATE PUBLIC WATERS

### TAKE NOTICE:

That Keith and Nancy Tiede of Kent, Washington on December 14, 1992 under Application No. G2-28736 filed for permit to appropriate public waters, subject to existing rights, from a well in the amount of 293 gallons per minute as needed year round each year, for multiple domestic and commercial supply.

The source of the proposed appropriation is located within NW 1/4 SW 1/4 of Section 2, Township 16 N., Range 3W W.M., in Thurston County.

Protests or objections to approval of this application must include a detailed statement of the basis for objections; protests must be accompanied by a two dollar (\$2.00) recording fee and filed with the Department of Ecology, at the address shown below, within thirty (30) days from April 7, 1993.

Re: Ground Water Application No. G 2-28736

Dear Sheri:

Pursuant to your letter and instructions dated March 12, 1993, we have had our notice of application published for two consecutive weeks in the Tenino Independent newspaper.

Enclosed is the Affidavit of Publication and copy of the notice from the paper.

For your information, we have been working with the Thurston County Public Health Department from the beginning of this project. The whole system has been engineered by Steve Hatton, P.E. of Howard Godat & Associates, Inc. in Olympia. Steve is currently working with Thurston County to gain the necessary approval for up to six connections.

Further, Steve has also been in contact with Karl Johnson, State of Washington Department of Health, and will continue to provide them with the necessary plans and specifications required for their approval of the system for more than nine service connections.

Please contact us should you require further information or action on our part regarding the application for water rights.

Sincerely,

  
Keith and Nancy Tiede

Attn: Harry Walden - Environmentalist

Re: Your letter dated March 9, 1993  
Ground Water Permit Application No. G2-28736

Dear Mr. Walden:

This letter is in response to your letter dated March 9, 1993. We would like to inform you with the background of what we have already done which led to the above Ground Water Permit Application.

For the past approximately four years, we have been working with the Thurston County Public Works Department and the Thurston County Public Health Department regarding development of our water system. The whole system has been engineered by Howard Godat & Associates, Inc. of Olympia, with Steven D. Hatton, P.E. being the current engineer on our project.

The whole concept came into being because we have properties in the "downtown" area of Littlerock which we would like to develop. However, it is a well-known fact that there is no acceptable source for a public or commercial water supply within this "downtown" area. Further, the Thurston County Comprehensive Plan calls for encouragement of neighborhood commercial endeavors in this area to serve the needs of the surrounding area.

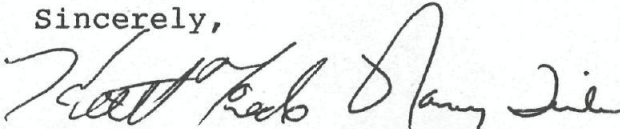

For these reasons, we began development of our water system. Mr. Hatton is currently still working with the Thurston County Public Health Department to gain system approval for the first nine connections.

Further, Mr. Hatton has also been in contact with Karl Johnson as suggested in your letter. However, Mr. Hatton has informed us that Mr. Johnson will not even look at the plans until the water right is granted.

In view of the above, we think we are current in contacting all the agencies involved in the process.

If we have over-looked, or are unaware of any necessary steps in gaining water rights approval and system approval, we would appreciate your letting us know.

Sincerely,

A handwritten signature in cursive script, appearing to read "Keith and Nancy Tiede".

March 12, 1993

Keith and Nancy Tiede  
7209 South 180th Street  
Kent, Washington 98032-1014

Dear Mr. and Mrs. Tiede:

Re: Ground Water Application No. G 2-28736

Your application for the appropriation of water has been assigned the above referenced number. Please refer to this number in future correspondence.

Enclosed is a notice of your application which must be published once a week for two consecutive weeks in a qualified legal newspaper of general circulation in the County or Counties in which the storage, diversion, and use is to be made and in other newspapers as directed. A list of these newspapers in your county is enclosed. The applicant is responsible for the payment of the publication. Please read the notice carefully to make sure it is correct. Should you find an error, please return the notice to our office for correction.

You should mail or deliver the enclosed notice to a newspaper regarding publication as soon as possible. When you receive the affidavit of publication with the news clipping from the newspaper, please forward the original to this office promptly. Further processing of the application will not be made until the affidavit is returned.

Since your application is for service of more than one residence, it is considered a public water supply. Public water supply systems are required to be approved by either the Local Health Department or the State Department of Health, depending upon system size. If you have not already done so, I suggest that you contact your Local Health Department or DOH, Drinking Water Section, Olympia, Washington, for further information.

A site investigation will be made by this office before we issue a permit decision. In light of our water right backlog, we estimate it will be about 18 months after receipt of your application before we are able to conduct the site investigation.

Sincerely,  
  
Sheri Fox
